

WIREPAS MESH

FW 2.0.0

1. MAIN FEATURE :

Changing settings OVER THE AIR

2. REASON FOR PRODUCT CHANGE

In addition to the BOTA (Boot Over The Air) functionality, available on the previous version, we have developed a functionality allowing to **change the parameters** of tags and sensors **Over The Air**. More detailed information will be available on our USER GUIDE on the production release date.

These evolutions thus offer the following secondary functionalities :

- New products and sensor

3. IDENTIFICATION

This new version is identified : **WIREPAS MESH 2.0.0**

5. SCHEDULE

Production : All the products listed below can be ordered from **January 19th, 2021**.

Beta version : Limited quantities required for testing have been made available from **October 19th, 2020**. Please contact our sales department to know availability or if you wish to order your products directly in this version. All the new products listed below will be provided in a β test version from the 19th October, 2020 up to the 19th, January, 2020.

During this period, the suffix “-beta” will be added to the new references. After this period of time, the new firmware 2.0.0 will be fully released after having integrated software corrections if needed. From this date, the suffix “-beta” will be deleted.

During this period, the user guide will not be available. Please, contact our technical support for more technical information.

The **Last Time Buy** date for ordering products with the old version will be **March 31, 2021**. Please contact our sales department directly for delivery times for this old version between January 19, 2021 and March 31, 2021.

Montpellier, October, 19th, 2020
